Special Literature

Definition:

Special literature refers to scientific and technological literature with a special publication format. It is often between books and periodicals with extensive and novel content and of complex types .

Types:

Dissertations

Conference papers

Patent documents

Standard documents

Science and technology reports (Research reports)

Government publications

Product samples etc.

1. Theses and Dissertations

Thesis definition: a proposition stated or put forward for consideration, especially one to be discussed and proved or to be maintained against objections.

Dissertations definition: a written thesis, often based on original research, usually required for higher degree.

A thesis or dissertation is a document submitted in support of candidature for an academic degree or professional qualification, presenting the author's search and findings. Theses include Doctoral theses, Masters-level theses and Bachelors-level theses. These can be accessed in hard copy or online.

In the UK, undergraduate and master's thesis is called dissertation, and doctoral thesis is called thesis.

In America, thesis is used for undergraduate and master thesis, and dissertation is used for doctoral thesis.

Therefore, different countries, different universities, and different projects may have different requirements for thesis. See the specific requirements clearly.

- Novel content, high academic value, long and professional
- Massive information and high intelligence value
- Sole author, and the paper is generally only for degree
- Collected by units and some specialized agencies
- Bachelor's degree thesis: About 12000 words
- Master's degree thesis: generally 40000-50000 words
- The doctor's degree is about 100,000 words.

Including: title, author, name of degree, name of school awarded, time for awarding degree, page number, supervisor , subject, source information, abstract etc.

Research and Implementation on Fall Action Analysis Technology in Household Scenarios CN

赵前龙
南京邮电大学

Abstract: With the development of computer network technology and the gradual improvement of intelligent terminal equipment, it is possible to create a smart, safe and convenient home life. Falling is a dangerous action that often happens in household scenarios. How to quickly and accurately detect fall action has become a hot research area in society. In recent years, computer vision and deep learning technologies have developed rapidly, providing a new way to solve this problem. Based on this popular field, a ex... [More](#)

Domestic: CNKI

中国科学技术大学
University of Science and Technology of China

The screenshot displays the CNKI website interface. On the left, there is a navigation menu with options: Literature Search, Knowledge Element, and Citation Search. A 'New User Guide' button is also visible. The main content area features a 'Journal Translation Project (JTP) Year-end Promotion' banner with a price tag of '\$8.99 per article'. Below the banner, there is a search bar with the placeholder text 'Search for journal articles, dissertations, proceedings...'. To the right of the search bar are links for 'Advanced Search' and 'Publication Search'. Below the search bar, there are several filter options: Journal, Thesis & Dissertation (checked), Proceedings, Newspaper, Yearbook, Monographic Serials (checked), AcademicFocus, Journal Translation Project, CNKI-eBooks, China Patents, and Standards. A dropdown menu is open over the search bar, listing search criteria: Subject, Keyword, Title, Full Text, Author, Institution, Abstract, Subhead, Reference, CLC Code, Literature Source, and DOI. The 'Subject' option is highlighted in the dropdown menu.

It is a full-text database of Chinese doctoral and master's dissertations with complete resources, high quality, and continuous and dynamic updates. The database publishes more than 400,000 doctoral dissertations from more than 490 doctoral training units, and more than 4.4 million master's degree theses from more than 770 master training units, dating back to 1984, covering basic science, engineering technology, agriculture, medicine, philosophy, humanities, social sciences and other fields.

The screenshot shows the Wanfang Data website interface. At the top, there is a navigation bar with links for '首页' (Home), '社区' (Community), and '应用' (Application). The main navigation menu includes '全部' (All), '期刊' (Journals), '学位' (Degree), '会议' (Conferences), '专利' (Patents), '科技报告' (Tech Reports), '成果' (Results), '标准' (Standards), '法规' (Regulations), '地方志' (Local Gazetteers), '视频' (Videos), and '更多>>' (More). The '学位' category is highlighted with a red box. Below the navigation bar is a search bar with the text '在 6676621 篇学位论文中检索' (Search in 6676621 theses) and a search button labeled '检索'. To the right of the search bar are links for '高级检索' (Advanced Search) and '检索历史' (Search History). Below the search bar is a breadcrumb trail: '首页 > 学位导航' (Home > Degree Navigation). The main content area features a description of the '中国学位论文全文数据库' (China Dissertations Database), stating it was established in 1980 and covers various disciplines. Below this is a filter section with tabs for '学科' (Discipline), '专业' (Major), and '授予单位' (Granting Unit). Under the '学科' tab, there are three filter boxes: '马克思主义、列宁主义、毛泽东思想、邓小平理论' (Marxism, Leninism, Mao Zedong Thought, Deng Xiaoping Theory), '哲学、宗教' (Philosophy, Religion), and '社会科学总论' (General Social Science).

The China Dissertations Database began in 1980, with an annual increase of more than 300,000 articles, covering sciences, industrial technology, humanities, social sciences, medicine, health, agricultural sciences, transportation, aerospace and environmental sciences.

ProQuest full-text database of doctoral and master's thesis is a full-text database jointly purchased and constructed by domestic universities on the basis of the PQDT dissertation abstract database. Up to now, the full-text data has reached more than 250,000. PQDT is the only full-text database in China providing high quality dissertations and theses, which mostly come from over 2000 American and European universities. The scope covers extensive aspects. It is the vital source of information for nowadays.

NDLTD is an online dissertation co-construction and sharing project supported by the National Natural Science Foundation of the United States.

It provides users with free dissertation abstracts and some free full text dissertations.

At present, more than 170 libraries, 7 library consortia, and more than 20 professional research institutes have joined the NDLTD, providing 70,000 dissertation abstract, and about 30,000 full-text papers which can be linked to.

In addition, since the member libraries of NDLTD come from all over the world, they cover a wide range of dissertations from European countries and Hong Kong, Taiwan and other places. However, there are relatively few abstracts and full texts available, so it is suitable for using as a supplementary resource for foreign dissertations.

2. Conference Literature

Conference literature refers to the materials and publications of various academic conferences, including abstracts of papers submitted in advance by the panelists, papers read or distributed at the conference, discussions at the conference, the official publication of the questions discussed, the exchange experience. It has become an important piece of information to focus on understanding a research field or research topic.

With the rapid development of science and technology, there are more and more societies, associations, research institutions and international academic organizations. In order to strengthen the exchange of information among fellow scientists, each academic organization holds various types of academic conferences regularly or irregularly every year. According to the statistics of the American Institute of Scientific Information (ISI), there are about 10,000 academic conferences held every year around the world. There are more than 5000 kinds of professional conference documents officially issued.

Conference Literature Categories

- **By time of content release**

1. Pre-conference documents : Conference schedule, paper catalog, abstract, preprint of conference paper
2. In-conference literature : Opening remarks, discussion notes and closing remarks
3. Post-meeting documents: proceedings, symposium, audiovisual data

- **By their organizational form and scale**

1. International conferences
2. Regional conferences
3. National conferences
4. Societies or association meetings
5. Industry joint conferences

Publication Format of Conference Documents

- (1) **Books:** Published in the form of books, usually called conference proceedings, mostly under the name of the conference
- (2) **Periodicals:** Published in technical journals, mainly academic journals sponsored by relevant societies and associations. Some journals often end with the form of a supplement or a special issue specializing in reporting important papers in an academic conference
- (3) **Science and technology report:** Some post-conference documents were compiled into scientific and technological reports, such as the four major scientific and technological reports in the United States.
- (4) **Audiovisual materials:** Audio and video recordings will be made during the meeting and will be published in the form of audiovisual materials after the meeting.

Different Names for Meetings

Congress: a formal meeting or series of meetings for discussion between delegates, especially those from a political party or labor union or from within a particular discipline.

Convention: a large meeting or conference, especially of members of a political party or a particular profession.

Symposium: a conference or meeting to discuss a particular subject.

Workshop: a meeting at which a group of people engage in intensive discussion and activity on a particular subject or project.

Summit: a meeting between heads of government, Asia Europe Summit

Forum: a place, meeting, or medium where ideas and views on a particular issue can be exchanged, Boao Forum For Asia

Colloquium: an academic conference or seminar.

It can generally reflect the latest progress and achievements in the subject or professional field. Many new discoveries and new equipment will also be announced and discussed for the first time at the conference. Its content is novel and academic, and it often represents the level and dynamics of various science and technology majors.

- Specificity
- Continuity
- Novelty
- Enormous

Difference between Conference & Journal

Conference Papers

- The main purpose of the conference is to exchange information and exchange ideas through on-site speeches.
- Conferences often reflect the latest and cutting-edge research, many of which have not yet reached the level of publication in official journals. Therefore, the main purpose of the conference is to quickly disseminate scientific research information in order to obtain valuable opinions and feedback from the audience.
- Meetings often try to cover many participants, so there is often higher paper acceptance rate.

Difference between Conference & Journal

Journal Articles

- No presentation and other verbal exchange of information
- Journal publication reflects more rigorous review and higher quality results
- Most journal articles have at least 3 reviewers to review the manuscript, and the associate editor will finalize the manuscript
- Journal papers must reflect the research status of the field, because reviewers will carefully review the cited documents
- The acceptance rate of journal papers is usually much lower than conference papers

If we want to participate in an academic conference or submit paper to it, we need to know in advance when and where meetings to hold, the organizer, and participation conditions etc.

Conference documents are mainly distributed in some websites and databases. It mainly includes the following four categories:

1. Conference information service website
2. Websites of related academic institutions
3. Chinese conference literature database
4. Foreign language conference literature database

1. Conference Information Service Website

Features: Free service, rich conference related information (pre-meeting report, conference schedule, conference video on demand, conference paper catalog and even full text).

(1) China Conference Network (<http://www.chinameeting.com>)

Publishes various conferences, exhibitions, training information and some international exhibitions held in China. Online registration is available. Users can register as their members and receive conference information through e-mail.

The screenshot shows the homepage of the China Conference Network website. At the top, there is a navigation bar with a search form (username, password, verification code) and a '登录' (Login) button. Below the navigation bar is the website logo '中国会议网' and the URL 'www.chinameeting.cn'. A message indicates that the Adobe Flash Player is disabled. The main content area features a '导航目录' (Navigation Directory) with a grid of industry categories. The '电力、热力的生产和供应业' (Electricity, heat, gas and water supply and supply industry) category is highlighted. Below the industry grid, there is a '地区' (Region) section listing various provinces and cities, and a '类型' (Type) section listing different types of events such as exhibitions, training, and seminars.

(2) Sciencemeeting Online (www.meeting.edu.cn)

Sciencemeeting Online is approved by the Ministry of Education and hosted by the Science and Technology Development of the Ministry of Education. It is an information service platform for scientific research and academic exchanges for scientific and technological personnel. The information provided by this website includes conference review, conference preview, report video, conference papers, etc.

(3) ALL CONFERENCE.COM

The screenshot shows the homepage of AllConferences.com. At the top right, there is a link for "Login or Sign up". The main header features the logo "ALL CONFERENCES.COM" in a red box, followed by the tagline "Global Conference Directory & Event Planning Solutions". To the right of the logo is a banner image of a woman in a business suit pointing, with the text "Don't Miss Out On Great Conferences. Get Notifications by Email!" and a "Sign Up" button with a right arrow. Below the banner is a red navigation bar with white text links: "Home", "Search Conferences", "Services", "Submit a Conference", "Advertise", "Help", and "Sign Up". Underneath the navigation bar, a red heading states "AllConferences.com is a Global Online Conference Directory", followed by the text "showcasing over 100,000 conferences, conventions, trade shows, exhibits, expos and seminars." To the right of this text is a yellow button with a plus sign and the text "Add a Conference". Below the text is a search bar with the placeholder "Search by Conference Name or Category", a red "Search" button with a magnifying glass icon, and a button labeled "ADVANCED SEARCH". At the bottom left, the text "Conferences by Category" is visible, and at the bottom right, a yellow button with the text "FEATURED CONFERENCES >>" is shown.

A catalogue website that provides various conference information. Users can also search the catalogue to obtain specific conference information. At the same time, the website provides services such as online registration and payment procedures. The range of conferences provided by the website includes academic conferences in various disciplines such as humanities and social sciences, business, computer and internet, and education.

2021 28th Conference of Open Innovations Association (FRUCT)

25 - 29 January 2021

FRUCT is a large cooperation framework between academia and industry in form of open innovations. In average FRUCT conferences are attended by representatives of 25 universities from Europe and Asia, and industrial experts from many companies, e.g., Dell, Samsung, Intel, Nokia, etc. The conference is an R&D forum for the most active students, academic experts, industrial researchers and influential representatives of business and government. The conference invites the world-class academic and industrial researcher to give lectures on the most relevant topics, provides an opportunity for student teams to present progress and results of their R&D projects, meet new interesting people and form new teams. The conference program includes intensive trainings on most relevant topic, keynote and invited talks, and high quality scientific sections.

3. Standard Documents

- **Definition:** Standards are formulated according to prescribed procedures, within a specific scope recognized by the agency or approved by the competent authority, such as specifications, rules and technical requirements.
- **Features:** The standards are legally binding. The technical regulations are detailed, complete, reliable, and frequently updated. Attention must be paid to the latest standards when searching.

Standard Documents

Classification:

1 According to the scope of application of the standard:

International standards, industry standards, local standards and corporate standards.

2 According to the maturity of the standard, it can be divided into: mandatory standard, recommended standards, trial standards and draft standards.

3 Foreign standards are divided into three levels: international standards, regional standards and National standard

Domestic Standard Access

- CNKI

- Wanfang Chinese and foreign standard data comes from the National Quality Supervision Bureau, covering 14 domestic and foreign standards databases.

Full Text Disclosure System of National Standards

The screenshot displays the website's interface for the National Standards Full Text Disclosure System. At the top, a blue banner features the text "国家标准全文公开系统" (National Standards Full Text Disclosure System) and "国家标准委发布 —— 权威 及时 便捷 免费" (Issued by the National Standards Commission — Authoritative, Timely, Convenient, Free). Below this, a navigation bar includes "首页" (Home), "强制性国家标准" (Mandatory National Standards), and "推荐性国家标准" (Recommended National Standards). A prominent yellow box labeled "Advanced Search" is overlaid on the search section, which includes a search bar with the placeholder "请输入标准号或标准名称" (Please enter standard number or standard name) and a "检索" (Search) button. To the left of the search bar, there are filter options for "标准类别" (Standard Category), "标准状态" (Standard Status), "发布日期" (Release Date), and "ICS分类" (ICS Classification). The "标准类别" section is highlighted with a red box and contains a "标准分类" (Standard Classification) link. Below the search bar, a grid of standard categories is visible, including "综合、术语学、标准化、文献 (1,168)", "社会学、服务、公司 (企业) 的组织和管理、行政、运输 (1,403)", "数学、自然科学 (904)", and "医药卫生技术 (1,161)". The interface also features a sidebar on the right with "普通检索" (General Search), "标准分类" (Standard Classification), and "高级检索" (Advanced Search) options. A yellow text box in the bottom left corner contains the text: "This system national stand Quality Supervision, Committee before Janu".

WeiPu Standard Information Service Platform

www.buidea.com

- It provides classified management and query applications for domestic and international standards.
- The platform adopts advanced cloud service models to simultaneously update standard change information issued by national authorities, reveal the replacement, adoption and citation of standards at the first time, and realize the real-time standard tracking service.
- The platform can query and manage more than 210,000 domestic standard metadata resources.

INNOVATION

NEW VENTILATOR STANDARD

International Organization for Standardization referred to ISO, established in 1947, is an international organization whose purpose is to promote international product exchange and cooperation. ISO certification has become an important part of the industry.

4. Scientific and Technological Reports

- A scientific report is a formal report on a scientific research project or scientific activity;
- Reports or situation records are written by research, design units or individuals;
- Report to the department or organization that provides funding and resources;
- Report on the progress of the design or project;
- It is for the purpose of accumulation, dissemination, and communication;
- Written in accordance with relevant regulations and formats, true and complete;
- Experience of personnel engaged in scientific and technological activities

Features

- The content is in-depth and novel;
- Each science and technology report is published in a single volume, written in a prescribed format;
- Each report has a serial number or the report number. The form is the abbreviation of the reporting unit or competent authority plus sequence number composition;
- With confidentiality.

Types

- According to the publication form: technical report, technical paper, technical bulletin, etc.
- Divided by research stage: initial report, progress report, annual report
- According to the nature of the report: formal report, special report, evaluation report

Effects

- Compared with books and periodicals, its length can be long or short, but it is new and extensive . It has strong professionalism and specific technical data.
- Priority reference materials for engineering personnel. It is useful for the exchange of various scientific research ideas
- Promote invention and creation, assess technological gaps, improve technological solutions, and increase decision-making, avoid duplication and waste in scientific research, and promote the transformation of scientific research results.
- Play a positive role for productivity.

Sunway Technology Report Resource Database

Including:

1. DOE report: It is a scientific research report produced by a scientific research institution affiliated to the U.S. Department of Energy and its contracting units.
2. DTIC report: collected and published by the Defense Technical Information Center of the United States.
3. NASA report: The report published by the National Aeronautics & Space Administration mainly comes from various research centers, laboratories, contract companies and university research institutes affiliated to the National Aeronautics and Space Administration
4. PB report: A report published by the Office of Publication Board (PB) of the US Department of Commerce.
5. Other reports: The database also contains technical reports and economic research reports from other government agencies, social groups, research institutions, universities

Facts

- Total collection including two parts: bibliographic abstract database and full-text database. The total number of bibliographic abstract data collected exceeds 2.6 million records, and the total amount of full-text data exceeds 1.5 million.
- Collection period: 1900 to present.
- Data increment: Approximately 50,000 new scientific and technological reports are added every year.
- The bibliography can be searched, and the full text needs to be delivered in the original text. Direct download is not provided. Only the first 5 original texts are available under each subject category.

摘要

Maintaining urban vitality and promoting sustainable urban development is a critical concern because global urbanisation continues to accelerate. This study creates a model to measure urban vitality by means of NPP-visible infrared imager radiometer sensor (VIIRS) nighttime light data and observes that urban vitality and NPP-VIIRS nighttime light data are highly positively correlated, which greatly expands the application of nighttime light data in urban research. This paper further researches the impact of population inflow and social infrastructure on urban vitality by establishing a panel fixed effect model based on the data of 35 large- and medium-sized cities in China to provide new ideas to understand urban vitality from the perspective of public service. The results illustrate that increasing the financial investment of social infrastructure can effectively improve urban vitality, and population inflow influences urban vitality through the interaction effect with social infrastructure. With the inflow population increasing, the educational financial expenditure's positive effect on urban vitality will be enhanced, and the medical and health financial expenditure's positive effect on urban vitality will be suppressed. This paper provides guidance regarding reasonable population inflow and urban vitality improvement.

Rural migrants
Hometown housing investment
Homeownership
Urban destination
Heterogeneous effects

ABSTRACT

The relationship between transnational housing investment and homeownership status in destinations has received considerable attention. However, the direct causal link between both activities remains scant. This study introduces a new conceptual and empirical framework, quasi-transnationalism and integration nexus, to discuss the causal effects of hometown housing investment on the homeownership of rural migrants in urban destinations. The research also applies a national representative data in China, the National Migrants Population Dynamic Monitoring Survey (NMPDMS), to explore such causal effect. The results show that hometown housing investment has a significantly negative effect on homeownership in urban destinations, whereas the substitution effect of hometown housing investment exceeds the complementary. The conclusions are consistent when IV-LPM regression is applied to correct the potential endogeneity of migrants' hometown housing investment. There are some notable differentials across life cycle groups and origin-destination groups, those are, hometown housing investment produces a larger negative effect for the old generation than the new generation, while it also plays a more important role for migrants who moved within the same regions, but the effect on the migrants from Central and Western China to East China is the weakest among the four origin-destination groups. The possible mechanism is that hometown housing investment influences the housing tenure choice through affecting the return migration plan and housing purchase intent in urban destinations.

1. Introduction

Homeownership is viewed as a sign of migrants' economic success. Owning a house is often portrayed as a long-term commitment to the host society and an important step toward the migration assimilation process (Alba and Logan, 1992; DeSilva and Elmelech, 2012; Painter

flow and immigrants are likely to settle permanently in the host countries, whereas less attention has been given to non-permanent groups (temporary residents or undocumented immigrants). As for the non-permanent immigrants, some of them migrate only to earn enough money to accumulate capital for investment in their hometown or supplement their family budgets (Owusu, 1998). They usually keep

If the database you choose, such as ASP, has a picture database, you can also see the pictures related to the keywords on the right side of the search results. Move the mouse to the top of the picture to quickly preview it. Click on the picture to display information about the picture.

The screenshot shows the EBSCO eBooks search results interface. At the top, there are navigation tabs: "New Search", "Subjects", "Publications", "Images", and "More". On the right side of the top bar, there are links for "Sign In", "Folder", "Preferences", "Languages", "New Features", and "Help". The user is identified as "Demonstration Customer".

The main content area displays a search result for the article "California Winter Precipitation Change under Global Warming in the Coupled Model Intercomparison Project Phase 5 Ensemble". The authors listed are NEELIN, J. DAVID; LANGENBRUNNER, BAIRD; MEYERSON, JOYCE E.; HALL, ALEX; and BERG, NEIL. The source is "Journal of Climate" and the date is "2013". The publication type is "Academic Journal".

The subjects are listed as "PRECIPITATION (Meteorology) -- Measurement; EFFECT of global warming on water supply; WINTER storms; RAIN & rainfall; GLOBAL warming; CALIFORNIA". The abstract states: "Projections of possible precipitation change in California under global warming have been subject to considerable uncertainty because California lies between the region anticipated to...".

Below the abstract, there are three options: "PDF Full Text(16.6MB)", "Add to folder", and "Detailed Record". A red circle highlights a small icon on the right side of the article title, which is used to open the preview window.

On the left side, there is a "Refine Results" section with "Current Search" and "Boolean/Phrase: global warming". There are also "Limiters" for "Full Text", "Subject: Thesaur", and "Limit To" with checkboxes for "Full Text", "References Available", and "Scholarly (Peer Reviewed) Journals".

On the right side, there is a "Share" section with a red circle around a small icon. Below it, there is a "Related Images" section with four image thumbnails and a "Find More" link. There is also a "Research Starters - Business" section with links for "Insurance Operations", "Environmental & Natural R...", and "LEED's Certification", each with a document icon and a "Find More" link.

Before clicking the full text, you can move your mouse to the icon on the right of the article title (as shown in the red circle above) to preview the summary of the article. The small preview window also provides a link to the full text (if the system provides Full text).

Click Edit, you can also change your search keywords or set restrictions, and the number of search results will also be changed.

Elsevier is the world's largest academic journal vendor platform. Based on the Sciencedirect platform, it provides online access to more than 2500 journals, covering various fields such as natural sciences, engineering sciences, humanities, and social sciences.

- Full-text database of all disciplines
- Recognized by 11 million scientific researchers in more than 130 countries
- One of the most used foreign full-text databases in China
- Fully integrated journals

Personalize

The world's leading technology publisher, providing customers with high quality through innovative information products and services

Content

- The world's largest publisher of scientific, technical and medical books and top academic journal publishers
- More than 60 branches have been established in more than 20 countries or regions around the world
- More than 7,000 employees worldwide

Features of Springer e-journals

- There are more than 1,580 Springer electronic journals
- More than 70% are included in SCI and SSCI
- Published at any time, updated at any time
- IP control, no concurrent user restrictions
- Integrate with all electronic resources of Springer to fully realize the link function
- Covers 11 disciplines, some journals have higher rankings in related disciplines

ProQuest Central is the largest single periodical resource available, bringing together subject areas including Business, Health and Medical, Language and Literature, Social Sciences, Education, Science and Technology, as well as core titles in the Performing and Visual Arts, History, Religion, Philosophy.

3. Open Access

- Open access journal which started in the late 1990s are scholarly journals that are available online to the reader without financial, legal or technical barriers.
- This is a new method of academic information exchange. Authors submit works and do not expect to receive direct monetary rewards, but provide these works so that the public can use them on public networks. For users, open access journals are free journals.

GoOA, a one-stop discovery platform for open access papers, is an open resource funded by the Chinese Academy of Sciences and launched by the Chinese Academy of Sciences Document Information Center. It contains more than 2500 OA journals and their full texts from 144 well-known publishing houses that have been strictly selected. The subject areas involve natural sciences and some social sciences.

The screenshot displays the GoOA website interface. At the top right, there are links for "Login | Registry" and "简体中文". The main header features the "Go OA" logo and the tagline "Go to Selected Open Access Journals". Below this is a blue navigation bar with the following items: Home, OA Journals, Journal Evaluation, APCheck, Open API (with a dropdown arrow), FAQs (with a dropdown arrow), About GoOA (with a dropdown arrow), OA Journal Ranking Reports, and a "My GoOA" button with a user icon. On the left side, there is a "Hot Concepts" section with a list of topics: Human(3398), gene expression(1294), aging(1229), taxonomy(721), evolution(706), biomarker(663), and angiogenesis(599). To the right of this list, there are four statistics: 2227 Journals, 477 Publishers, 575148 Articles, and 520204 Figures/Tables. Below these statistics is a search interface with two dropdown menus set to "Articles" and "Title", a search input field, and a "Search" button.

Resource features include:

- 1) **Journal selection:** Establish strict selection criteria for OA journals to make "OA paper discovery" more authoritative;
- 2) **Paper integration:** provide nearly 2000 OA journals in the natural sciences, efficient journal integration and paper organization, making "OA paper discovery" easier;
- 3) **Contribution analysis:** provide quality assessment of OA journals and complete analysis of submission information, allowing you to know everything about OA journal submissions with one click, and you don't have to worry about submitting;
- 4) **Associated retrieval:** realize associated knowledge discovery and retrieval, allowing you to have an experience beyond expectations;

The Socolar platform is dedicated to collecting free OA electronic full-text journals on the internet. At present, it has reached 11,739 types, involving various disciplines. Among them, there are many high-quality journals that can be used as auxiliary resources for scientific research and teaching.

Research & Critical Evaluation

Seven Steps of Research

1. Define your research question
2. Ask for help
3. Develop a research strategy and locate
4. Use effective search techniques
5. Read critically, synthesize, and seek meaning
6. Understand the scholarly Communication Process & Cite Sources
7. Critically evaluate sources

Art of Reading a Journal Article

Art of Reading a Journal Article

Reading scientific literature is mandatory for researchers. With an overflow of journals, it is essential to develop a method to choose and read the right articles.

Objective: To outline a logical and orderly approach to reading a scientific manuscript. By breaking down the task into smaller, step-by-step components, one should be able to attain the skills to read a scientific article with ease.

Methods: The reader should begin by reading the title, abstract and conclusions first. If a decision is made to read the entire article, the key elements of the article can be perused in a systematic manner effectively and efficiently.

Cognitive Strategies

- Read the information related to the name of the journal and the authors' affiliation
- Read the title of the article, read the headings and subheadings
- Looked at the images/illustrations of the article
- Activated prior knowledge related to the topic of the article
- Tried to predict the topic of the article
- Underlined the unknown words
- Guessed the meaning of some of the unknown words

Cognitive Strategies Continued

- Checked the meaning of some of the unknown words in an English to English dictionary
- Skipped difficult and incomprehensible words/sections
- Translated difficult sections into your own language
- Highlighted important information
- Took notes of important information
- Skimmed through unimportant or irrelevant parts, paraphrased some sentences, reread sentences, wrote a summary
- Developed a simple filing system that works for you

Key Points

- Reading articles on a regular basis will improve your reading skills and the information you learn from them
- Develop a simple, searchable filing system that works for you if you are
- Undertaking a piece of research
- Most eminent scientists will usually direct you right to the figures after a brief abstract and introduction to outline the research question
- The abstract is a brief synopsis of the article providing a useful summary
- A double-blind peer review is where both author and reviewer are unknown to each other before publication; essential for absolute scrutiny and to ensure that the research is both accurate and without bias.
